**DETAILED ACTION**

***Notice of Art Unit Number Change***

1. Please note that the Art Unit number associated with this Application has changed from 3628 to 3677.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. § 119, which papers have been placed of record in the file.

***Drawings***

3. It should be noted that the drawings have not yet been reviewed by a PTO draftsman. The drawings will be reviewed upon allowance of the application and Applicant will be apprised of their status accordingly.

Art Unit: 3677

***Claim Rejections - 35 USC § 112***

4. Claims 2 and 8 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As concerns Claims 2 and 8, these claims do not further limit the prior claim, since these claims contain only functional/intended use limitations. Note that the claims cannot be amended to positively claim the interaction between the ring and the body, since such would be drawn to nonstatutory subject matter under 35 U.S.C. 101.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tessler US 5,560,224 in view of the GPI Web Client Printout for JP 410075809A.

Tessler shows a band with a ditch portion and a stone, but lacks a stone fixed on opposite sides of the ring. JP '809 teaches that affixing stones to opposite sides of a ring is known. It

Art Unit: 3677

would have been obvious to a person having ordinary skill in the art at the time of applicant's invention to modify the ring to have a ditch portion and stone on opposite sides of the ring in view of JP '809 in order to provide a more interesting ring. In regards to the specific stones claimed, it would have been obvious to one having ordinary skill in the art at the time of applicant's invention to use any of the stones claimed, since the examiner takes Official Notice of the use of diamonds, sapphires, rubies, and emeralds in jewelry and the selection of any of these known stones to use would be within the level of ordinary skill in the art.

7. Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tessler US 5,560,224 in view of the GPI Web Client Printout for JP 410075809A and Kirshbaum US 3,307,374.

Tessler and JP '809 teach the claimed invention, but lack initials. Kirshbaum teaches the use of indicia on rings. It would have been obvious to a person having ordinary skill in the art at the time of applicant's invention to modify the ring to include indicia in view of Kirshbaum in order to provide a more personalized ring. In regards to the specific stones claimed, it would have been obvious to one having ordinary skill in the art at the time of applicant's invention to use any of the stones claimed, since the examiner takes Official Notice of the use of diamonds, sapphires, rubies, and emeralds in jewelry and the selection of any of these known stones to use would be within the level of ordinary skill in the art.

Art Unit: 3677

***Response to Remarks***

8. The rejection under 35 USC 112 2nd paragraph has been withdrawn in view of Applicant's comments; as Applicant has pointed out, there is no prohibition as to the inclusion of functional language in a claim. However, it is also pointed out to Applicant that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987), and since no structural limitations are present in Claims 2 and 8, the prior art is considered to meet these limitations. If it is Applicant's belief that Claims 2 and 8 require the prior art to have the 180 degree aspect of the ditch portions, the Examiner disagrees; Applicant would have to amend the claims to positively recite the 180 degree aspect of the ditch portions and relate this to those structural limitations of the ring which are positively claimed.

***Patent Customers Advised to FAX Communications to the USPTO***

9. In view of delays in mail delivery in recent days, we at the USPTO would like to encourage you to communicate with the USPTO via facsimile. **Facsimile transmissions may be used for correspondence as set forth in 37 CFR 1.6 such as: amendments, petitions for extension of time, authorization to charge a deposit account, an IDS, terminal disclaimers, a notice of appeal, an appeal brief, CPAs under 37 CFR 1.53(d), and RCEs.**

Art Unit: 3677

PTO Form 2038 should be used when authorizing payment by credit card; this form is maintained separate from the file to ensure confidentiality.

The USPTO has recently installed server software that enables us to automatically receive facsimile transmissions and route them to the appropriate groups. No special equipment is needed by our customers to use this system other than a regular facsimile machine. Each Technology Center has its own facsimile numbers associated with our server for Official replies to non-final Office actions and for Official replies to final Office actions. In addition, each Technology Center has a Customer Service Center on our server system and can answer any general application status questions you might have, can provide Examiner information and answer paper queries.

The following is a list of all Official Facsimile numbers for Technology Center 3600:

TC 3600:

Before Final 703-872-9326

After Final 703-872-9327

Customer Service 703-872-9325

By using the Official Before Final and After Final numbers, our server system will automatically generate a return receipt that will include the number of pages received as well as the date and time the facsimile was received. Additionally, the return receipt will include an image of the received cover page. Applicants are advised to use the certificate of facsimile transmission procedures when submitting a reply to a non-final or final Office action by facsimile (see 37 CFR

Art Unit: 3677

1.6 and 1.8). Applicants are also advised to retain the return receipt in the event that the Office has no record of the facsimile submission, whether the facsimile submission is a reply to an Office action (37 CFR 1.8(b)), or a continued prosecution application under 37 CFR 1.53(d)) (37 CFR 1.6(f)).

**Note, however, the Office currently does not permit new application filings (other than a CPA under 37 CFR 1.53(d)), requests for reexamination, drawings, and certain correspondence set forth in 37 CFR 1.6(d) by facsimile.**

*Conclusion*

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrea Chop whose telephone number is (703) 305-6358.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-2168.
